complimentary STEM  
ecosystem which includes  
Engineers To Be, Scientists To  
Be and Coding & Robotics.

**Directly after  
school**

Our Little Chefs offers a rich and engaging culinary journey designed to inspire young minds through the art and science of baking. Each term begins with a comprehensive Food Safety and Skills session, setting the foundation for a series of unique culinary learning experiences. Students will develop both sweet and savory recipes, honing their skills and gradually gaining the confidence to personalize and refine their own creations.

## Unique Aspects of the Programme

### The Business of Baking

Each term, students will delve into commercial skills relevant to the food industry, such as food photography, videography, and understanding the commercial aspects of baking. This holistic approach ensures they gain practical knowledge that extends beyond the kitchen.

### Personalized Recipe Books

Throughout the programme, students will compile their skills and creations into a personalized recipe book. This empowers them to reproduce and refine their recipes, documenting their culinary journey and achievements.

### The Science of Food Technology

Students will explore how different techniques affect food, learning the science behind raising dough, achieving vibrant colors, creating varied textures, and enhancing flavors. This scientific approach deepens their understanding and appreciation of culinary arts.

### Food Safety & Hygiene

We prioritize safety and hygiene at the highest standards. Our activities are backed by in-depth risk assessments, and our expert educators are fully qualified in food safety. To ensure a safe environment, all our recipes adhere to a strict 'no raw meat' policy.

### Culinary Creativity & Artistry

Creativity and art are integral to our programme. Students will be encouraged to express themselves through food, from designing unique cake decorations to experimenting with color and presentation. Artistic sessions will include using edible paints, creating intricate pastry designs, and crafting visually appealing plate presentations. This emphasis on creativity ensures that students not only develop technical skills but also cultivate their artistic talents.

## CHILDREN FACE A FUN CHALLENGE EACH SESSION THE CHALLENGES VARY BETWEEN DIFFERENT FIELDS OF ENGINEERING, SCIENCE AND CODING.

In doing so, we are building up a new generation  
of engineers – **one edutainment** experience at a time.

---

## SCIENCE + TECH + ENGINEERING + MATH = STEM

- The children will solve engineering based challenges
- They will code their own video games
- They will build small engineering based projects
- They will learn how to use different tools
- They will manufacture safe and sustainable toiletries and cosmetics

---

## YOUR CHILDREN WILL LEARN THE FOLLOWING

- Understanding of engineering concepts
- Learn basics of coding
- Experiment different science experiments
- Have fun and make new friends
